

1. Generate and deliver clean energy: transportation systems and electricity
2. Create and implement integrated adaptation plans: in regard to technology and how people behave
3. Develop effective partnerships: based on assurance, performance metrics, and communication

- Needs to be at three time scales: short-, mid-, long-term

- We have the money but we don't have the time. Stop asking for money or it won't happen. Our partnerships and systems of working together haven't been working so we need to change them or we will run out of time.
